

Implementation is not keeping pace

Why has implementation not kept pace with planning?

- Threshold of intent
- Accountability
- Momentum
- Sufficient resources

FRIP Objectives

Work with a group of municipalities to develop a suite of infrastructure project prospectuses that private investors could help municipalities realize in the future.

Work from both sides of the problem, involving both financial institutions and other funders alongside municipalities.

Develop a concise and usable 'Ready-to-Fund' toolkit for broad use by many municipalities.
